

Forensic and Investigation Services

Sometimes surprises are ugly. Your IT staff find a large encrypted file on a company server. However, the server is not supposed to have encrypted files. What do you do?

Security-Assessment.com's Incident Response Team are those rare professionals who are highly skilled in the art of identifying, investigating and preserving evidence. They will work with you to preserve mission critical data, limit costly damage and testify on your behalf in a court of law.

Whether analysing web browser caches, identifying malicious code or recovering damaged files, Security-Assessment.com is there to help you.

Examples of incidents that require a Forensic Response:

- Employee misuse of company computing resources;
- Employee theft of company intellectual property;
- Internal hacking of corporate resources;
- Recovery of accidental or malicious deletion of data, and;
- External attacks against company computer resources.

Our Core Capabilities & Resources include:

- Clear concise analysis and reporting;
- Expert testimony and litigation support;
- Computer Security Incident Response Team for rapid response;
- Mass storage for the support of large recovery and analysis methods.

Security-Assessment.com uses tried and proven methods in our analysis and investigations, which may include some of the following dependant on the situation:

- Analyse suspicious Internet or system usage;
- Defeat password protected data;

- Provide specialist legal advice including copyright and IP protection
- Examine hard-drives, tape and other storage media;
- Examine systems logs, server audit logs and firewall system logs;
- Identify malicious code;
- Obtain an image copy of individual systems;
- Obtain image of networked systems;
- Protect images and evidence on safe media and forensically sound techniques;
- Recover and reconstitute file fragments;
- Recover hidden and deleted files;
- Recover slack and free space;
- Secure the processing facility;
- Analyse the web browser cache;
- Analyse chronology of incident data;

Please contact us if you would like to discuss or require further information regarding our System Forensic Investigation services.
