

**QUALYS**  
SECURITY ON-DEMAND

## QUALYS**GUARD**® CONSULTANT

*“False positives, missed vulnerabilities and poor discovery increase the time needed to conduct an engagement. QualysGuard’s KnowledgeBase of vulnerability checks eclipses any of the other products we use for vulnerability scanning. It provides a much more accurate list of targeted systems and a more thorough analysis of a network.”*

Michael Raggo, CISSP  
Senior Security Consultant  
**VeriSign – Worldwide Professional Services**

*“@stake feels comfortable recommending the QualysGuard service to its own customers and feels equally comfortable using this service to enhance and extend its own consulting needs.”*

@stake, Inc.

QualysGuard Consultant enables auditors to reduce their time on-site by scoping and performing detailed vulnerability assessments remotely, anytime and anywhere. QualysGuard Consultant allows network security auditors to conduct engagements faster and more efficiently through easy setup and accurate, comprehensive results.

*QualysGuard Intranet Scanner makes internal vulnerability scanning engagements easy and cost-effective.*

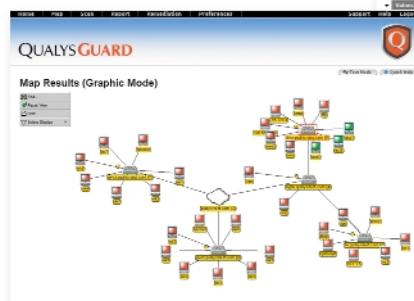

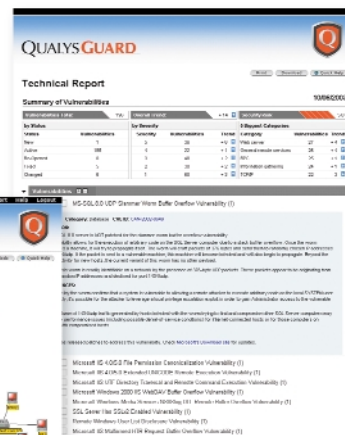

Utilizing the most comprehensive database of unique security vulnerabilities, QualysGuard Consultant makes it possible for security professionals to deliver accurate network security audits and vulnerability management services to clients.

**QualysGuard Consultant is ideal for professional service organizations and security consultants who:**

- Provide network auditing and risk reduction services
- Require an accurate, scalable solution that can be quickly deployed and used remotely in engagements of any size

**Benefits of QualysGuard Consultant:**

- One tool: Network discovery, OS and application detection and assessment all in a single solution—with no software to install or manage
- Scalable auditing: Rapidly deploy and expand engagements and entire practices around QualysGuard’s distributed scanning and Web service architecture
- Reduce on-site time: Scope engagements remotely and conduct internal and external network assessments from any location at any time
- Customizable reports: Predefined and customizable templates, centralized reporting and editable export formats reduce time needed to prepare deliverables

## QualysGuard Consultant Features:

### Reporting

- Web-based reporting immediately available from any location
- Easily customizable reports for client-specific engagements
- Centralized data saves time spent consolidating results from multiple tools
- Graph and trend summary reports for executives
- Detailed reports with verified remedies easily appended to deliverables
- SANS Top 20 Report provides industry baseline
- Network topology visualization to easily assess and scope a client's network
- CVE-linked vulnerability checks for correlation to external standards
- Secure architecture provides controls for results integrity
- Ticket trending and reports by owner, group and vulnerability to measure network threat level
- Reports export to HTML, MHT, and XML for easy import into deliverable templates

### Accurate and Thorough Vulnerability KnowledgeBase

- Vulnerability KnowledgeBase detects 3,000+ unique security vulnerabilities
- Automatic daily updates to vulnerability database eliminates the need to download and install updates before scanning
- Map feature detects and identifies servers, desktops, routers, wireless access points and other networked devices
- Fingerprints over 40 protocols for OS and application fingerprinting
- Non-intrusive detection techniques minimize impact on customer networks
- Scanning methodology does not require host login credentials
- Customized scans configurable for optimal performance based on client's network

### Support/Maintenance

- Support is available 24x7
- QualysGuard requires no additional maintenance or operating costs
- All functionality and management is available from a Web browser
- All signature updates and feature enhancements are completed automatically, transparent to the user

*QualysGuard Intranet Scanners can be easily deployed at client sites and controlled remotely from any location.*

### QualysGuard Consultant Starter Kit

The QualysGuard Consultant Starter Kit includes:

- One Intranet Scanner
- 250 scans
- Professional travel case

This special Starter Kit is only available to consultants. Additional scans and/or additional Intranet Scanner appliances can be purchased at any time. Please contact Qualys for current pricing.

### Winner. Computerworld Innovative Technology Awards (Sept/2003)

The Computerworld Innovative Technology Awards distinguish vendors that are nominated by their customers for offering leading-edge products or services that provide measurable payback. QualysGuard was selected as the security award winner from a field of 350 nominations.

### Winner. TechWorld Recommended (Sept/2003)

*"Qualys scores above and beyond the competition as it uses an attack database which lists many thousands of weaknesses and these are regularly updated whenever a new threat is identified...[Qualys is] a very sophisticated vulnerability scanning service that delivers a huge amount of easily accessible information about the state of your local network."*

## InfoWorld

### InfoWorld (Dec/2002)

*"QualysGuard is a winner...It's easy to use, and it produces thorough vulnerability assessments and, perhaps more important, easy-to-understand results from its vulnerability scans."*
